

AQUA-RAIL SAFETY HANDRAIL

INSTALLATION INSTRUCTIONS

FIXED NON-ROTATING HANDRAIL

PLEASE READ INSTRUCTIONS CAREFULLY BEFORE BEGINNING INSTALLATION.

For a Rotating Handrail see other side

STEP 1

Determine the desired rail location on your spa cabinet, i.e. which side of the steps you require it.

STEP 2

Slide the two Brackets (B) on to the handrail Arm (A) and roughly position them where you would like to attach the handrail on your spa cabinet. (See Fig. 1)

STEP 3

Using the Bolts lightly tighten the Bracket to the Handrail from the back of the Bracket, through the holes provided. (See Fig. 2)

STEP 4

Place the Aqua-Rail on the cabinet and check the position of the Brackets. The top Bracket needs to be positioned slightly under the acrylic shell and the bottom Bracket near the bottom of the Handrail.

STEP 5

Once you have adjusted the position of the Brackets on the Handrail make sure you tighten the Bolts (C) so the Handrail is secure.

(See Fig. 2)

STEP 6

Mount the two Brackets (B) making sure it's vertical and straight, on the cabinet using the screws provided. (See Fig. 2)

Note: To prevent splitting of the cabinet, pre-drill screw holes with 1/8" drill bit.

STEP 7

Snap on the black Screw End Caps

ITEM	PART #	DESCRIPTION	QTY
A	HR00001	HANDRAIL ARM	1
B	HR00002	BRACKET	2
C	HR00003	BOLTS	4
D	HR00004	BRACKET SCREW	16
E	HR00005	SCREW END CAPS	16

AQUA-RAIL SAFETY HANDRAIL

INSTALLATION INSTRUCTIONS

360 DEGREES ROTATING HANDRAIL

PLEASE READ INSTRUCTIONS CAREFULLY
BEFORE BEGINNING INSTALLATION.

For a Fixed/Non-Rotating Handrail see
other side

STEP 1

Determine the desired rail location on your spa cabinet, i.e. which side of the steps you require it.

STEP 2

Slide one of the brackets (B) on to the Handrail Arm (A), this will be your top Bracket (B TOP). Place the Aqua-Rail on the cabinet and check the position of the Bracket. The top Bracket needs to be positioned slightly under the acrylic shell.

STEP 3

Mount the Top Bracket (B) making sure it's vertical and straight, on the cabinet using the screws provided (D) (See Fig. 2)

Note: To prevent splitting of the cabinet, pre-drill screw holes with 1/8" drill bit.

STEP 4

Using ONE Bolt, tighten the bolt through the bottom hole on the bottom bracket (C). This prevents the handrail from slipping through the bottom bracket and allows 360 degree rotation of the handrail. (See Fig. 2)

STEP 5

Slide the Bottom Bracket onto the bottom of the Handrail Arm (A) until the Bolt (C) hits the bottom of the Handrail Arm. Making sure the bottom Bracket lines up vertical and straight to the top bracket, mount the bottom bracket to your spa cabinet using the screws provided (D) (See Fig. 2) *Note: To prevent splitting of the cabinet, pre-drill screw holes with 1/8" drill bit.*

STEP 6

Snap on the black Screw End Caps

ITEM	PART #	DESCRIPTION	QTY
A	HR00001	HANDRAIL ARM	1
B	HR00002	BRACKET	2
C	HR00003	BOLTS	4
D	HR00004	BRACKET SCREW	16
E	HR00005	SCREW END CAPS	16
